SUMMARY

Software Engineer with a drive for efficiency and excellence in cutting-edge technologies. Hardworking and collaborative. Passionate about developing and creating. Seeking to continue to gain more knowledge and experience in Software Engineering.

WORK EXPERIENCE

Station Casinos (Contractor)   Las Vegas, NV
Software Engineer I   2022-2024

Agile Development: Participated in a scrum/agile team to deliver high-quality software that aligned with business requirements and timelines.

- Created strategies for developing new products/projects.
- Planned out full sprints and was completely self-managed.
- Played critical role in the scope of each iteration/sprint to maintain scalable solutions.

Project Development: Led and contributed to multiple projects, designing, and developing scalable applications and robust APIs.

- Built full stack application with modern frameworks: Nestjs, React, Next.js.
- Highly documented each sprint: code documentation, dependency documentation, and how-tos.
- Integrated QA for scrum teams. Wrote unit tests as well as delivering functionality to production.
- Lead SQL developer on team.
- Brought groundbreaking products that would generate more customer engagement.

Database Management: Owned and maintained the databases our products relied on, including migrations and maintainability.

Legacy Maintenance: Maintained products hosted in .NET environments that were not refactored or migrated.

Collaboration and Communication: Worked closely with cross-functional teams, including UI/UX designers, product managers, and architecture teams to deliver cohesive and well-integrated solutions.

Own Your Product: Ensured all tickets for products were acknowledged and well-documented.

- Maintained over 5,000 machines in production.

Currey Adkins   El Paso, TX
Software Engineer Intern   2021-2022

Built tools for Health Data Analytics: Developed tools for automating health data analytics using COBOL for enhanced security.

- Automated the output of critical data points for investigation across multiple counties.

Other Work Experience

Inn of the Mountain Gods Resort and Casino
Snowboard Instructor   2016-2018

Taught Private Lessons: Taught private lessons, fostering an engaging and enjoyable learning environment for clients from diverse backgrounds.

Schneider Electric
Wire Technician   2017-2018

Mass production of industrial switchboards: Built components that would then go into QC. These components would range from 15 to 30 pounds.

Rentex Audio Visual & Computer Rentals
Inventory Manager   2014-2015

Insync Show Productions
Project Assistant

EDUCATION

New Mexico State University
Bachelor of Arts in Computer Science
